

## Abyssinian

*The Abyssinian is a colourful cat with a distinctly ticked coat, medium in size, well balanced and giving the impression of standing on tiptoe. It is lithe, hard and muscular, showing eager activity and a lively interest in all surroundings.*

<b>HEAD</b>	A modified, slightly rounded wedge without flat planes. Gently rounded brow and slight nose break essential. A shallow indentation forming the muzzle is desirable. Firm Chin.
<b>EARS</b>	Set wide apart and pricked, broad at base, medium to large in size and well cupped. Lynx-like tufts desirable but not essential.
<b>EYES</b>	Set well apart, almond shaped, large, brilliant and expressive.
<b>NECK</b>	Elegantly arched.
<b>BODY</b>	Medium in length, lithe, and graceful, showing well developed muscular strength without coarseness. Conformation strikes a balance between cobby and svelte.
<b>LEGS</b>	Proportionately slim and fine-boned.
<b>PAWS</b>	Small and oval. Giving the impression of being on tiptoe when standing.
<b>TAIL</b>	Thick at base, proportionately long and tapering to a blunt tip.
<b>COAT</b>	Soft and fine in texture, dense and resilient to the touch, with a lustrous sheen. Short, but of sufficient length to accommodate two or three bands of ticking.
<b>EYE COLOUR</b>	Yellow, orange, hazel or green
<b>MARKINGS</b>	Eyes accentuated by dark rims, encircled by light coloured fur. Treble ticked preferred. A dark spine, or necklace (which must be broken) will not militate against an otherwise good specimen. Pads set in dark fur, which extends up the back of the hind legs. Tail ends in a solid tip of colour. White or off-white permitted on upper throat, lips and nostrils only.
